

# Hepatitis B can affect you

Hepatitis B can kill.....

It is a dangerous liver disease.

**If you show the following symptoms, you may have hepatitis B:**

- Yellow skin and eyes.
- fever and fatigue.
- loss of appetite.
- nausea and vomiting.
- joint pain.
- grey-coloured bowel movements.

**Anyone can get hepatitis B.**

**You are at greater risk if you:**

- have unprotected sex with more than one partner.
- share needles as an injecting drugs.
- have had a blood transfusion and are not sure of the source.

**Protect yourself from hepatitis B.**

**Prevent hepatitis B:**

- get vaccinated against hepatitis B.
- use condoms while having sex.
- do not share toothbrushes, razors, nail clippers.
- do not shoot drugs or share needles.
- ask for blood and blood products to be screened for hepatitis B.

**Get yourself tested for hepatitis B.**

**You may have hepatitis without showing any symptoms.**

**Know it. Confront it. Hepatitis affects everyone, everywhere.**
